# Displacement Snapshot

Sudan | Cross-border movement into Chad

5-year trend | October 2026 | Displacement Snapshot Generator

MOCKUP - LAYOUT PREVIEW - ALL DATA ILLUSTRATIVE

## Key Figures

| 4.7M | 1.9M | +154% |
|---|---|---|
| people displaced within Sudan | refugees & returnees crossing borders | IDP growth since 2019 |

Every figure in this brief is footnoted with its source, URL and retrieval date. In a real run all numbers are fetched live from the cited open databases; anything unavailable is flagged, never estimated.

## 1. Displacement overview

Sudan remains one of the world's largest displacement crises. Internal displacement has grown sharply over the five-year observation window, with the steepest increase from 2023 onwards (Figure 1). Cross-border movement into neighbouring countries - principally Chad, South Sudan and Egypt - accounts for a further share, placing sustained pressure on host communities.

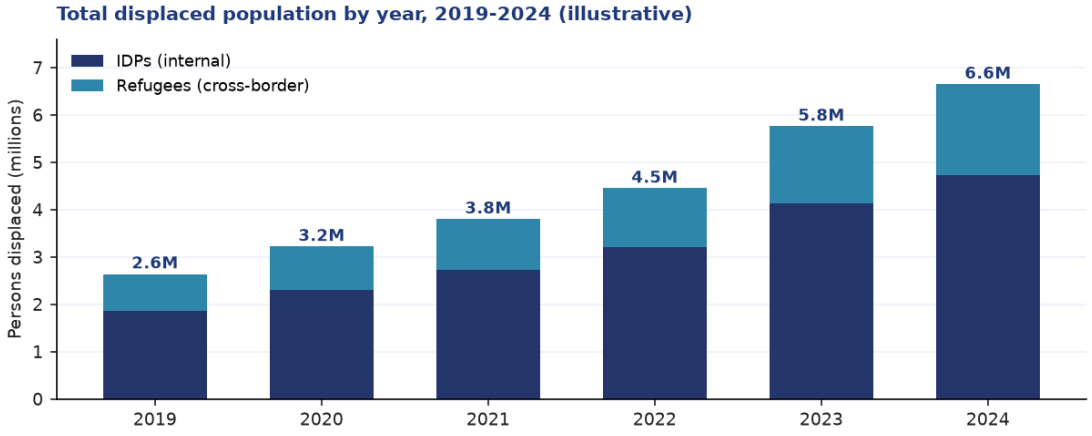

Figure 1. Displaced population by year, internal vs cross-border (illustrative).

## 2. Drivers of displacement

Armed conflict is the dominant trigger of new displacements, but disaster events - flooding and drought-linked livelihood failure - drive a rising share each year (Figure 2). Climate-linked displacement is increasingly entangled with conflict dynamics: resource pressure and seasonal livelihood loss precede many of the movements recorded under the conflict heading.

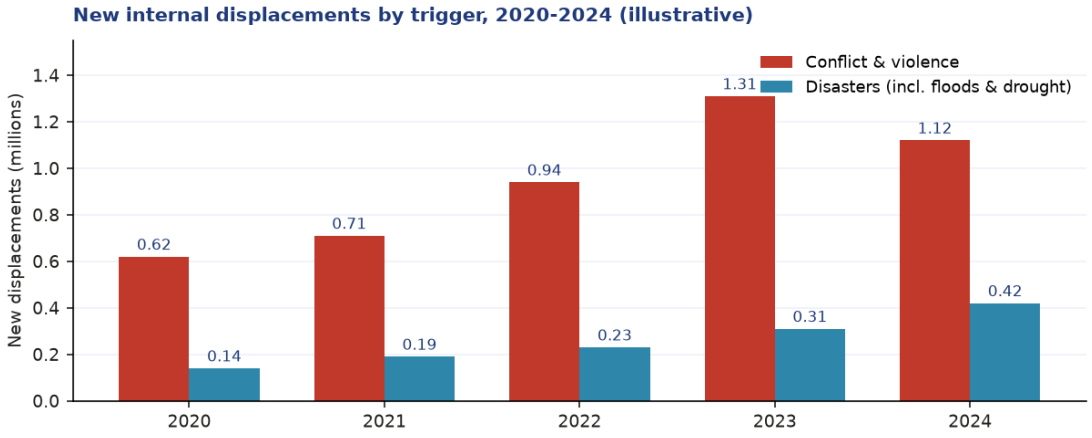

Figure 2. New internal displacements by trigger, conflict vs disasters (illustrative).

## 3. Host-country context: Chad

- Over 1.1M refugees and returnees hosted, concentrated in the eastern provinces
- Host communities face pressure on water, grazing land and basic services
- Rains cut access to remote camps for parts of the year

## 4. Response & frameworks

The regional refugee response plan and the humanitarian programme cycle set the current planning figures; the Global Compact for Migration and the Global Compact on Refugees frame the international response. Links to the primary planning documents are cited in the annex.
